

Criteria for admission of students and criteria for setting the "automatic machine" in the discipline "biological chemistry"

1	Criteria for admission to the final lesson in biochemistry	<ol style="list-style-type: none"> 1. Abstract on the questions of the final lesson in the format of "question-answer". 2. A credited laboratory notebook for all classes. 3. Absence of missing practical and lecture classes (with the exception of classes missed on the eve of the final).
2	Criteria for admission to credit in biochemistry	<ol style="list-style-type: none"> 1. Positive assessment at the final lesson of the semester. 2. In case of unsatisfactory grades in the final classes, they must be worked out before passing the test. 3. No missing lectures and practical exercises.
3	Eligibility Criteria for the Biochemistry Exam	<ol style="list-style-type: none"> 1. Knowledge of the main metabolic pathways and reactions. 2. No missing lectures and practical exercises.
4	Criteria for issuing an exam "automatic" in biochemistry	<p>The final grade for the discipline based on the results of the rating without an additional survey at the exam is set subject to the following condition: the result of the rating by the time of the exam is 7.0 and above, without taking into account the bonus score for research work, the decision is made at the meeting of the department.</p> <p>Rating calculation method https://gsmu.by/upload/file/kafedra%20studentu/biohimia/8-3.pdf).</p>
