from «____» _____ 20____ year

to «____» _____ 20____ year

Gomel
20_____

DUTIES OF THE STUDENT DURING PRACTIC

Obtain the practice referral from the Practice Department of the University, an individual assignment from the department, acquaint yourself with the practical training program and obtain a diary.

Arrive in due time at the practice site, pass instructing on the protection of labor, be acquainted with the internal rules of the health care institution, should have a paper on medical examinations.

Obtain and study the program of practice and individual task.

Comply with the rules of the internal labor regulations of the health care institution.

Learn and strictly follow the rules of labor protection and safety.

Be responsible for the work and its results equally with staff members.

Qualitatively and fully perform tasks according to the program of practice.

Every day keep a diary to record all performed work.

Actively participate in the public life of the organization.

Demonstrate careful attention to the patients and staff of health care institution, observe the principles of professional ethics and deontology.

Present report on implementation of all tasks of practice, health education conversation text and ERW (educational research work) to the practice supervisor in due time.

Pass differentiated credit-test on practice in due time.

REQUIREMENTS FOR COMPLETING A DIARY

1. The diary should take place daily, indicating the section, date and time of work (speech time 8.00-14.00, 14.00-20.00).
2. Every day in the column "Content of completed work" all work performed in accordance with the practice program, its quantity and level of preparation is displayed. The regulatory and medical documentation with which the student worked, the name and dosage of the medications and disinfectants used, the procedures performed, preparation for research, etc. are indicated.
3. At the end of each working day, the diary is signed by the immediate supervisor of the practice from the organization and from time to time the supervisor of the practice from the department comes to him.
4. Upon completion of the internship, the student fills out a report on the implementation of the internship program, sums up the mastery of practical skills, and indicates information about the healthcare institution.
5. The summary report must correspond to the number of types of work that is reflected in the diary for each day of work. The report should provide a list of acquired practical skills with the level of their mastery (1, 2 or 3).
6. The report is signed by the student, the immediate supervisor of the practice from the organization, approved by the head of the organization and certified by the seal of the healthcare organization.
7. The diary records sanitary education work and UIRS.

8. At the end of the internship, the immediate supervisor of the internship from the organization issues a written review of the student's internship, where he notes: a) the completeness of the internship program and an assessment of the quality of the work performed; b) compliance with labor discipline, labor protection requirements, sanitary and epidemiological regulations; c) characteristics of personal qualities (communicative, moral, volitional).

PRECONDITION FOR ADMITTANCE FOR THE DIFFERENTIATED CREDIT TEST

1. A student who has completed the internship program in full and has received a positive review from the practice supervisor from the medical institution is allowed to take differentiated credit.
2. The student submits to the head of practice from the department a signed practice diary, an approved summary report and a signed review, materials of sanitary educational work (text of the conversation, sanitary bulletin or memo, etc.) and UIRS.
3. Students who do not provide reporting documents are not allowed to take a differentiated test.
